Steyr SBS

Steyr Mannlicher

The Best Steyr Yet!

Announcing the birth of a new tradition:

The Steyr Safe Bolt System (SBS) hunting and sporting rifle.

With all the classic features of a traditional American rifle, all the quality Steyr is known for, and the unparalleled safety afforded by today's most advanced designs and technology - the Steyr Safe Bolt has it all.

And it's all yours for the most affordable price you've ever seen on a Steyr.

Safe Bolt Forester

Safe Bolt ProHunter

Unprecedented Safety and Reliability.

Because of the human factor, no mechanical device and no firearm is 100% safe. Firearm safety is ultimately the responsibility of the user. In view of these facts, Steyr has incorporated safety design features into the SBS that dramatically enhance safe handling and usage.

The ambidextrous roller tang safety has three positions - **Fire, Loading and Safe:**

•**Fire** - In this position (red dot visible only) the rifle is ready to fire.

•**Loading** - In this position (white dot visible only) the trigger safety is engaged. The rifle may be loaded and unloaded with the safety in this position.

•**Safe** - In this position (white dot and gray safety catch visible) the safety is engaged. The rifle will not fire and the bolt will not open.

As an added measure of safety, when the safety is in the Safe position the bolt handle may be moved to the Double Lock/Safe position. The firing pin is now locked.

For further safety, the receiver features a safety bushing that encases the extractor, thus providing an additional safety margin for unexpected excessive chamber pressures. Front locking lugs increase functional reliability at high gas pressures.

Ice and residue grooves on the body of the bolt increase reliability under freezing and adverse conditions.

The Steyr SBS

The ambidextrous roller tang safety has three positions: Fire, Loading and Safe.

Safe Bolt positions: "Open", "Ready", "Double Lock/Safe".

The Steyr SBS features the distinctive Steyr forging marks on the barrel and a high quality matte blue finish on both receiver and barrel.

The detachable four-round SBS magazine can be lowered approximately 1/4" to a drop-lock position. This position allows the shooter to easily unload the chamber and additionally offers single round feeding by hand.

The Ultimate Value in a Firearm.

Unlike any other hunting and sporting rifle, the new Steyr SBS combines the best classic bolt-action design with the ultimate in advanced safety technology. The added safety features of the SBS system provide unparalleled protection both on and off the field.

Combined with the traditional Steyr quality and manufacturing excellence, the SBS gives American hunters and sportsmen the best of all possible worlds for the best possible price. The affordable Steyr SBS brings a new world of firearms excellence within the range of every American who has ever wished to own the very best. The Steyr SBS. Quite simply the best Steyr yet.

Safe Bolt Forester

Safe Bolt ProHunter

A Tradition of Excellence.

The SBS is the next generation in a long line of superbly crafted firearms. More than 130 years ago, when Josef Werndl established the original manufacturing facility in the Austrian city of Steyr, he made a personal commitment to the highest standards of technical expertise and craftsmanship.

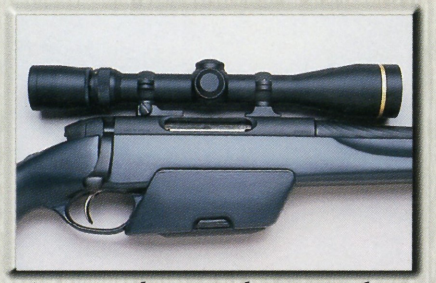
Generations later, Steyr's unswerving dedication to perfection is reflected in the high regard hunters, sportsmen, and collectors place in the name Steyr. The SBS maintains the Steyr tradition of quality in every detail. No corners have been cut, no hours of attention spared in crafting the cold hammer forged barrel that like every Steyr firearm-characterizes the SBS.

Designed to meet the ultimate standards of accuracy, comfort, long service life and reliability, the SBS is quite simply the hunting and sporting rifle Americans have been waiting for.

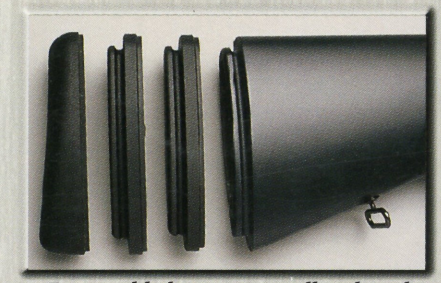
The ProHunter features an injection-molded advanced synthetic stock, the Forester a classic American style in solid walnut. Both feature the distinctive Steyr forging marks on the barrel and a high quality matte blue finish on both receiver and barrel. Receivers are tapped to accept a wide range of U.S. scope mounts.

Both SBS models represent the perfect synthesis between the latest production engineering methods and quality assurance in accordance with ISO 9001, thus providing the utmost in dependability and reliability for generations to come.

THE STEYR SBS AT A GLANCE



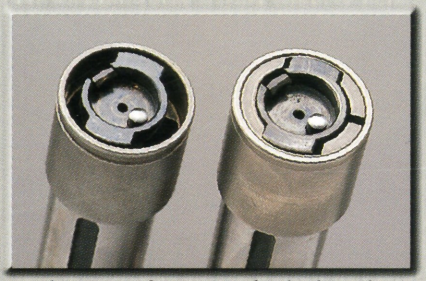
An optional 10 round magazine kit is available for the ProHunter model. (Magnum calibers, 8 rounds)



Removable butt spacers allow length of pull to be adjusted for optimum fit and comfort. (ProHunter model)

The detachable four-round SBS magazine can be lowered approx. 1/4" to a drop-lock position.

Ice and residue grooves on the body of the bolt increase reliability under freezing and adverse conditions.



The receiver features a safety bushing that encases the extractor, thus providing an additional safety margin for unexpected excessive chamber pressures.
